Leni Riefenstahl's Olympia is among the such a lot debatable movies ever made. Capitalizing at the luck of Triumph of the Will, her propaganda movie for the Nazi Party, Riefenstahl secured Hitler's acclaim for her grandiose plans to movie the 1936 Berlin Olympics. The outcome was once a piece as infamous for its politics as celebrated for its aesthetic power. Taylor Downing offers an necessary consultant to this significant paintings of movie documentary. He offers the whole tale of the way Riefenstahl negotiated relative independence from the Nazi experts by means of pitting Hitler opposed to Goebbels, the propaganda Olympia minister, who sought after entire control. Downing additionally supplies a filmmaker's insights into the logistical and technical difficulties thrown up via handling a creation which hired approximately 40 cameramen to shoot 400,000 metres of film. He concludes that although its political impact used to be to glorify Nazi achievements, the movie Olympia undeniably set the normal for Olympic filmmaking for the following 5 decades.

provides a superb clarification as to why this movie was once so outstanding for its time. every little thing from the technical advances (new different types of cameras have been created only for this project) to the ancient Olympia context (Riefenstahl was once capable of have artistic keep watch over because of her being revered through Hitler). It additionally sheds mild on Riefenstahl's involvement within the Nazi party, and why Olympia this actual movie will not be disregarded as propaganda.
